

## Human Development A Look at Theories: Part I (Key)

### Across

- 6. Watson's theory that states that experience guides behavior and development **Behaviorism**
- 9. Piaget's stage that states that preschoolers learn to use symbols, language, and pretend play to represent things that have been learned **Preoperational**
- 11. Piaget's stage that states that infants learn primarily through the five physical senses **Sensorimotor**
- 12. Freud called this the central part of our personality **Ego**
- 13. The art of teaching children **Pedagogy**
- 14. Piaget's theory that states that children construct their own learning **Constructivism**

### Down

- 1. Vygotsky's term for when adults or more advanced peers help a child up to the next level of learning **Scaffolding**
- 2. Ainsworth's theory about young children and how they relate to their parents **Attachment**
- 3. Vygotsky's theory that people and culture impact our growth and development **Sociocultural**
- 4. Freud's theory that all thoughts and activities are influenced by unconscious mind **Psychoanalytic**
- 5. Piaget's stage that states that logical, organized thinking appears in middle childhood **Concrete operations**
- 7. According to Freud, this is where our conscience lies **Superego**
- 8. Pavlov stated that this creates learning through repeated experiences **Conditioning**
- 10. The art of helping adults learn **Andragogy**
