

Sustainable Food Service Webquest

Follow the steps to each question and answer each problem using the link below:

Website: www.sustainablefoodservice.com

1. In a restaurant operation, 2 oz. plastic cups for salad dressing and measuring various items are used.
 - a. Click on biodegradable products on the left side
 - b. Scroll down and click on Be Green Packaging
 - c. Click on the bowls and cups image
 - i. How many cups are in a case? _____
 - ii. Click on “download product list”
 - iii. Click on the sample cup – 2 oz.
 - iv. What is the cost of a case of cups? _____
 - v. What is the price per cup? _____

The current price for 2 oz. portion cups is \$37.67/2500 cups. The green packaging is more expensive. How would you justify the increase cost?

2. Return to the sustainable foodservice webpage and click on “energy efficiency.” Review the pie chart depicting restaurant energy use and identify the three areas of operating a restaurant that use the greatest amount of energy. Include the percentage of energy used for each.
 - a.
 - b.
 - c.
3. Return to the sustainable foodservice webpage and click on “food.” Scroll to the Farm to “_____” section.
 - a. Scroll down and click on the Farm to College website
 - b. Click on link “Learn more about the basics of farm to college”
 - c. Briefly summarize the Farm to College program.

Sustainable Food Service Webquest
